Light Collection

Brillo.
design Alessio Bassan

Brillo è un punto di luce racchiuso da una sfera di vetro trasparente o opalino e sostenuto da un esile stelo in metallo, che diventa un'articolata collezione di lampade a LED per interni.

A sospensione è disponibile singolarmente oppure in composizioni lineari, circolari o a grappolo.

A soffitto combina più steli e sfere in unico rosone, mentre a parete è un unico segno liberamente posizionabile e con tre diverse lunghezze. Infine, in versione da tavolo e terra con base circolare.

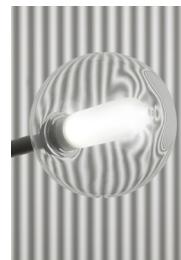

Brillo is point of light enclosed in a transparent or opal pyrex glass and supported by a thin metal stem, that becomes a varied collection of LED lamps for interiors.

In the suspensions type it is available individually or in (bespoke) linear, circular or cluster compositions.

The ceiling type combines multiple stems and spheres in a single canopy, while the wall one is a single freely adjustable sign with three different stem lengths.

Finally in the table and free-standing versions with a round base.

TRANSPARENT OPAL WHITE

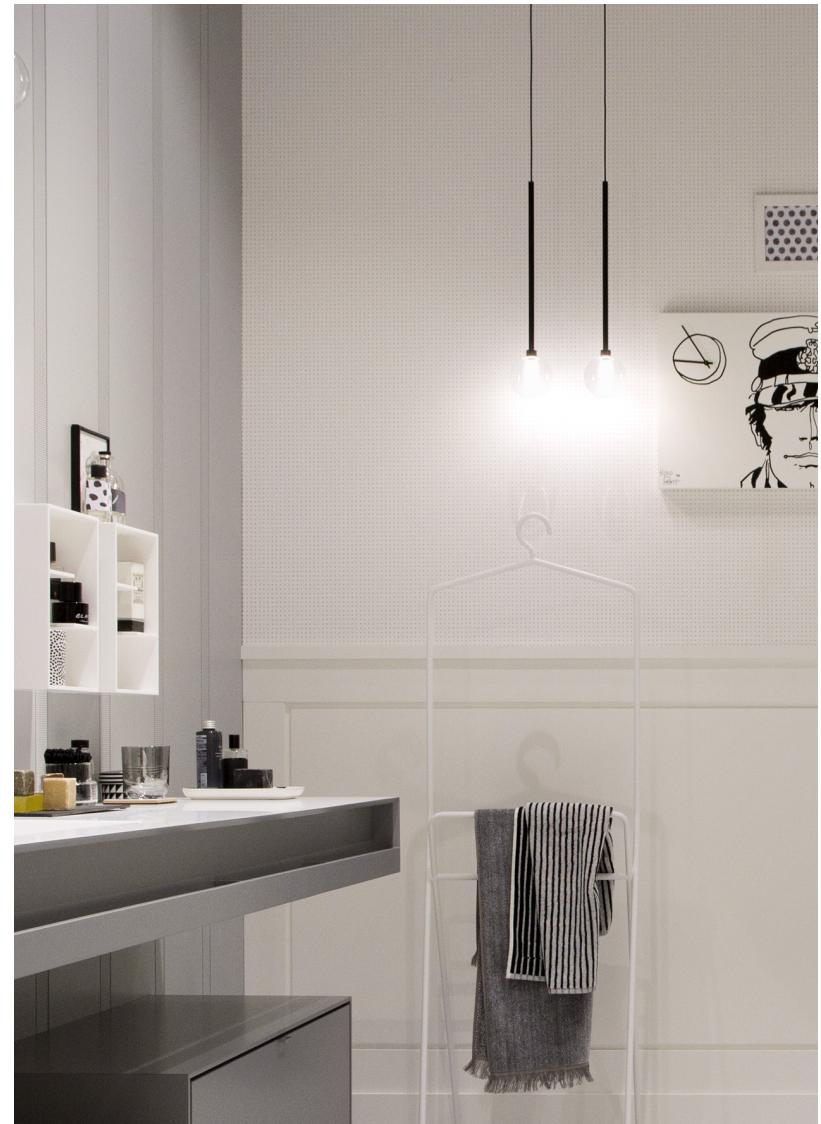

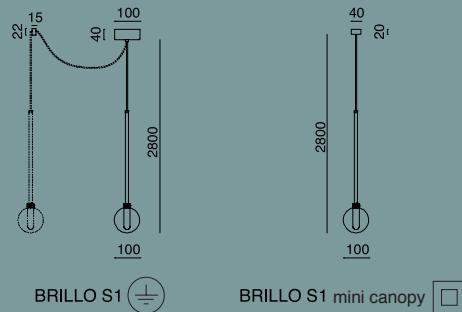

BRILLO S1. S1 mini canopy

Lampade a sospensione a luce diffusa per composizioni lineari, circolari o a grappolo. Struttura e rosone centrale (con attacco decentrato) o per controsoffitto, in metallo verniciato a polveri in nero opaco.
